

4.0 CARATTERISTICHE TECNICHE

4.0 TECHNICAL FEATURES

4.1 Introduzione

I motori MT - MOTORI ELETTRICI sono costruiti in conformità con la direttiva europea ATEX 94/9/CE e con le principali normative europee riguardanti le apparecchiature e i sistemi di protezione per le atmosfere esplosive a causa della presenza di gas o polveri. Rispetto alla progettazione, costruzione e prova dei motori standard si applicano misure supplementari per assicurare che, in condizioni di funzionamento normale o in condizioni anormali specificate, i motori destinati all'uso in aree potenzialmente esplosive non producano archi, scintille o temperature eccessive.

4.1 Introduction

MT – Motori Elettrici electric motors are built in compliance with the European ATEX 94/9/CE directive and based on the main European regulations for protection equipment and systems for potentially explosive atmospheres. This catalogue indicates features and specifications in terms of planning, manufacturing, tests and marking of electric motors to be used in potentially explosive atmospheres due to the presence of gas or dust. Additional measures are implemented to design, manufacture and test standard motors in order to make sure that the motors to be used in potentially explosive environments do not produce electric arches, sparks or high temperature in standard or specific abnormal operating conditions.

4.2 Descrizione dei motori

4.2 Motor description

Atmosfera esplosiva Explosive atmosphere	Protezione Protection	Classe di temperatura Temperature class	Tipo motore Type	Grandezza Size	Poli Poles	Potenza max Max power (kW)	Tensione max Max voltage (V)	Frequenza Frequency (Hz)
1 e 2 II 2G	Ex e	T4 T3	TN	56 ÷ 200	2, 4, 6, 8	37	600	50/60
			DN	63 ÷ 160	2-4, 4-6, 4-8, 2-6, 2-8, 6-8	17	600	50/60
			MN	56 ÷ 100	2, 4, 6	2,2	240	50/60
21 e 22 II 2D	Ex tb IP 65	T100°C T135°C	TN	56 ÷ 200	2, 4, 6, 8	37	600	50/60
			DN	63 ÷ 160	2-4, 4-6, 4-8, 2-6, 2-8, 6-8	17	600	50/60
			MN	56 ÷ 100	2, 4, 6	2,2	240	50/60

Motori asincroni trifase e monofase a gabbia di scoiattolo con altezza d'asse:

- TN 56 ÷ 200 (trifase standard);
- DN 63 ÷ 160 (trifase doppia polarità);
- MN 56 ÷ 100 (monofase standard);

Asynchronous three-phase and single-phase squirrel cage motors with shaft height:

- TN 56 ÷ 200 (standard three-phase motors);
- DN 63 ÷ 160 (double polarity three-phase motors);
- MN 56 ÷ 100 (standard single-phase motors);

Costruzione in lega d'alluminio pressofuso ad elevata resistenza meccanica;

Die-casting aluminium gear case with high mechanical resistance;

Caratteristiche elettriche e meccaniche conformi alla EN 60034-1;

Electric and mechanic features in compliance with EN 60034-1;

Grado di protezione IP65;

IP65 protection class;

Classe di isolamento F/H;

F/H Insulation class

2, 4, 6, 8, 2-4, 4-6, 4-8, 2-6, 2-8, 6-8 poli;

2, 4, 6, 8, 2-4, 4-6, 4-8, 2-6, 2-8, 6-8 poles;

Tensione di alimentazione: fino a 600 V. La tensione di alimentazione ammessa può variare +/- 5%;

Voltage supply: up to 600 V. The tolerance for voltage supply is +/- 5%;

Servizio S1;

S1 service;

Ventola in metallo o ventola in plastica con resistenza superficiale inferiore a 10⁹ Ohm;

Metal or plastic fan with surface resistance below 10⁹ Ohm

Morsettiera conforme a EN 60079-7 e EN 60079-15;

Terminal board in compliance with EN 60079-7 and EN 60079-15 regulations

Possibilità di alimentazione tramite inverter;

Suitable for inverter use

In caso di alimentazione tramite inverter obbligo di utilizzo di protezioni termiche applicate sulle testate dell'avvolgimento (n° 3 protezioni per i motori trifase e n° 1 per motori monofase);

It is necessary to use thermal overload protection on the winding heads for inverter use (3 thermal overload protections for three-phase motors and 1 protection for single-phase motors);

Nel caso di motori monofase i condensatori saranno installati esternamente al motore e dislocati in zona sicura oppure alloggiati all'interno di un'apposita custodia aggiuntiva a prova di esplosione (Ex d).

For single-phase motors, capacitors are mounted on the motor externally and located in a safe area or inside of a specific explosion-proof housing (Ex d).
